Dear Committee members,

As announced in the very first Spokesperson report, the BitShares Blockchain Foundation wants to institute an Advisory Board to have even more contact with the Community. Until our legal Council PaulHastings advises our Community on how to shape this for the future, we invite the Committee members to take this new role upon them.

A seat on the Advisory Board is not personal, but linked directly to the voted position of Committee Member in the Community of the BitShares Blockchain governance system. This guarantees that the governance principle is honoured. The position in the Advisory Board is not a legal position towards the BitShares Blockchain Foundation and does not carry liability for its actions.

It is a moral role towards the Community to advise the BitShares Blockchain Foundation on items it puts before the Advisory Board. These items will in the next weeks mainly concentrate on the massive task of getting our house in order, good enough to keep the listings and when we can, expand. As NDA's are personal, the Advisory Board will not be privy to information that, when released leads to personal liabilities. The Foundation will however always share whatever is possible.

When it comes to information shared it is, as we feel, of value to the Community when balanced opinions can be formed by the Committee to have a mature and professional message to our Community and, we often forget that, to the entire world. It will hopefully contribute in a positive way to a stable image of the BitShares Blockchain and further its use in every aspect worldwide.

When the Committee does the Community the favour of accepting this responsibility, we propose the Committee informs the Community.

Kind regards,

On behalf of the BitShares Blockchain Foundation

Annemieke Dirkes
